

Travis J. Kessler

University of Massachusetts Lowell
One University Avenue, Lowell, MA 01854

(978) 201-7710
travis.j.kessler@gmail.com
<https://github.com/tjkessler>

Data scientist and doctoral candidate with more than seven years of experience in academic research and open-source software development. Confident in directing teammates and students as a project manager and instructor. Capable of communicating across numerous scientific, engineering, and business disciplines. Achievements include successfully developing machine learning models to efficiently discover cleaner, economically viable liquid fuels and fuel additives. Skilled in applied machine learning, data mining/pipelining, probability and statistics, and software engineering development/management.

TECHNICAL SKILLS

Software Languages

- Python, C, C++
- Javascript, HTML, CSS
- SQL/NoSQL
- Bash/Shell

Software Tools

- TensorFlow/Keras, PyTorch
- Scikit-Learn, Pandas
- MongoDB
- Git, SVN

Software Environments

- Azure Web Services
- Amazon Web Services
- Windows Server 2012+
- Linux (Headless, GUI)

EDUCATION

PhD Computer Engineering – GPA 3.78

University of Massachusetts Lowell
May 2023 (Expected)

BS Computer Engineering – GPA 3.56

University of Massachusetts Lowell
May 2018

EXPERIENCE

Graduate Research Assistant

Jan. 2019 – Present

University of Massachusetts Lowell Energy and Combustion Research Laboratory

- Leverages predictive models, including state-of-the-art machine learning models, to advance alternative fuel research
- Investigates methods for neural network feature selection and hyper-parameter tuning, including random forest trees, principal component analysis, artificial bee colonies, and various optimization algorithms
- Evaluates predictor/target variable relationships using a variety of statistical methods
- Manages a team of undergraduate computer science/engineering students in tasks related to current research efforts
- Published research efforts in *The Proceedings of the Combustion Institute*, *The Journal of Open Source Software*, and the *American Society of Mechanical Engineers Internal Combustion Engine Fall Conference*

Graduate Teaching Assistant

Jan. 2019 – Present

University of Massachusetts Lowell Department of Electrical and Computer Engineering

- Directs undergraduate students in a laboratory setting, supervising curriculum instruction, performing one-on-one assistance/troubleshooting, and administering/grading course material
- Confers with laboratory supervisor to formulate efficient methods of course material delivery and laboratory management
- Course repertoire includes Circuits I, Circuits II, Electronics I, and Electronics II labs

Technical Operations/DevOps Engineer

June 2018 – Jan. 2019

Valora Technologies

- Used data mining techniques to extract client-specified information from legal, financial, and government documents
- Constructed data pipelines to usher client documents from intake to delivery of extracted information
- Trained newly hired DevOps engineers in data pipelining/mining workflow configuration

Undergraduate Research Assistant

June 2015 – May 2018

University of Massachusetts Lowell Energy and Combustion Research Laboratory

- Optimized predictive models to predict chemical properties based on molecular structure (QSAR/QSPR)
- Implemented optimal neural network architectures for multidimensional input and target data
- Developed open-source machine learning, feature extraction, and hyper-parameter tuning software packages
- Published research efforts in *The Journal of Open Source Software*, *Fuel*, and the *American Society of Mechanical Engineers Internal Combustion Engine Fall Conference*

SELECTED AWARDS & HONORS

Best Presentation, ASME ICEF 2019 Conference

Oct. 2019

1st place, Symbiotic Warehouse Robot Prototyping Competition

May 2018

Innovative Technology Solution, UMass Lowell DifferenceMaker 50K Idea Challenge

April 2017

1st place, Francis College of Engineering Prototyping Competition

Dec. 2016
