

TRAVIS JOSEPH KESSLER
University of Massachusetts Lowell
One University Avenue, Lowell, MA 01854
travis.j.kessler@gmail.com, (978) 201-7710

Graduate student with 4 years of experience in academic research and open source software development. Confident in directing teammates and students as a project manager and teaching assistant. Capable of communicating across numerous scientific, engineering and business disciplines. Achievements include developing machine learning models to predict molecular properties with 34% more accuracy than historical average. Skilled in applied machine learning, data mining/pipelining, statistics, and software engineering development/management.

TECHNICAL SKILLS

<i>Software Languages</i>	<i>Software Tools</i>	<i>Software Environments</i>	<i>Working Environments</i>
* Python, C, C++	* TensorFlow, Keras	* Azure Web Services	* AGILE/SCRUM
* Javascript, HTML, CSS	* Scikit-Learn	* Amazon Web Services	* DevOps Lifecycle
* SQL	* Matplotlib	* Windows Server 2012+	* Kanban Organization
* Bash/Shell	* Git, SVN	* Linux (Headless, GUI)	* MRPT DoJ Clearance

EDUCATION

PhD Computer Engineering – GPA 4.00
University of Massachusetts Lowell
May 2024 (Expected)

BS Computer Engineering – GPA 3.56
University of Massachusetts Lowell
May 2018

EXPERIENCE

Graduate Research Assistant *Jan. 2019 – Present*
University of Massachusetts Lowell Energy and Combustion Research Laboratory

- * Leverages predictive models, including state-of-the-art machine learning models, to advance alternative fuel research
- * Investigates methods for feature selection and hyper-parameter tuning, including random forest trees, principal component analysis, genetic algorithms and artificial bee colonies
- * Manages a team of undergraduate computer science/engineering students in tasks related to current research efforts
- * Funded by the U.S. Department of Energy under award DE-EE0008479 as part of the Co-Optimization of Fuels & Engines (Co-Optima) project

Technical Operations/DevOps Engineer *June 2018 – Jan. 2019*
Valora Technologies

- * Utilized data mining techniques to extract client-specified information from legal, financial and government documents
- * Constructed data pipelines to usher client documents from intake to delivery of extracted information
- * Trained newly hired DevOps engineers in data pipelining/mining workflow configuration
- * Obtained Moderate Risk Public Trust (MRPT) Department of Justice (DoJ) security clearance

Undergraduate Research Assistant *June 2015 – May 2018*
University of Massachusetts Lowell Energy and Combustion Research Laboratory

- * Optimized predictive models to predict chemical reaction properties based on molecular structure (QSAR/QSPR)
- * Implemented optimal neural network architectures to multidimensional input and output (training) data
- * Developed open source machine learning, feature extraction and hyper-parameter tuning software packages
- * Published research efforts in The Journal of Open Source Software, Fuel, and the American Society of Mechanical Engineers Internal Combustion Engine Fall Conference

SELECTED AWARDS & HONORS

1 st place, Symbotic Warehouse Robot Prototyping Competition	May 2018
Innovative Technology Solution, UMass Lowell DifferenceMaker 50K Idea Challenge	April 2017
1 st place, Francis College of Engineering Prototyping Competition	Dec. 2016
UMass Lowell Francis College of Engineering Dean's Scholarship	Sep. 2014
