<https://github.com/tjkessler>

Machine learning engineer and data scientist with more than nine years of experience in academic research and open-source software development. Confident in directing teammates and students as a project manager and instructor. Capable of communicating across numerous scientific, engineering, and business disciplines. Achievements include successfully developing machine learning models to efficiently discover cleaner, economically viable liquid fuels and fuel additives. Skilled in applied machine learning, data mining/pipelining, probability and statistics, and software engineering development/management.

TECHNICAL SKILLS

- Python, C/C++, MATLAB
- TensorFlow/Keras, PyTorch
- Scikit-learn, NumPy, Pandas
- Jupyter Notebook
- OpenCV
- Predictive/statistical modeling
- Clustering and classification
- Regression and transformers
- Data visualization
- Web scraping
- AWS, GCS, Azure
- SQL (Postgres, MySQL)
- NoSQL (MongoDB)
- Git/SVN
- Docker

EDUCATION

PhD Computer Engineering
University of Massachusetts Lowell
May 2023

BS Computer Engineering
University of Massachusetts Lowell
May 2018

EXPERIENCE

Research Engineer *Oct. 2023 — Present*
AIMdyn, Inc.

- Utilizes Koopman Operator Theory-based generative AI and other cutting-edge machine learning methods for the analysis, prediction, and control of complex dynamical systems
- Implements modular and scalable MLOps/data pipelines to efficiently process and store models, parameters, and results/metrics

Graduate Research Assistant *Jan. 2019 — Sep. 2023*
University of Massachusetts Lowell Energy & Combustion Research Laboratory

- Leveraged predictive models (deep learning, graph neural networks, etc.) to advance alternative fuel research
- Investigated methods for neural network feature selection and hyper-parameter tuning, including random forest trees, principal component analysis, artificial bee colonies, and various optimization algorithms
- Evaluated predictor/target variable relationships using a variety of statistical methods
- Managed a team of undergraduate computer science/engineering students to support research efforts
- Published research efforts in *The Proceedings of the Combustion Institute*, *The Journal of Open Source Software*, and the *American Society of Mechanical Engineers Internal Combustion Engine Fall Conference*

Implementation/DevOps Engineer *June 2018 — Jan. 2019*
Valora Technologies

- Extracted text/numerical information from legal, financial, and government documents
- Constructed data pipelines to usher client documents from intake to delivery of data (ETL)
- Trained newly hired DevOps engineers in data pipelining/mining workflow configuration

Undergraduate Research Assistant

June 2015 — May 2018

University of Massachusetts Lowell Energy & Combustion Research Laboratory

- Optimized predictive models to predict chemical properties based on molecular structure (QSAR/QSPR)
- Implemented optimal neural network architectures for multidimensional input and target data
- Developed open-source machine learning, feature extraction, and hyper-parameter tuning software packages
- Published research efforts in *Fuel*, *The Journal of Open Source Software*, and the *American Society of Mechanical Engineers Internal Combustion Engine Fall Conference*

SELECTED AWARDS & HONORS

Dean's Gold Medal for Outstanding Academic Achievement	May 2023
Computer Engineering Department Award for Outstanding Ph.D.	May 2023
Best Presentation, ASME ICEF 2019 Conference	Oct. 2019
1 st place, Symbotic Warehouse Robot Prototyping Competition	May 2018
Innovative Technology Solution, UMass Lowell DifferenceMaker 50K Idea Challenge	April 2017
1 st place, Francis College of Engineering Prototyping Competition	Dec. 2016
