

TRAVIS JOSEPH KESSLER

University of Massachusetts Lowell
One University Avenue, Lowell, MA 01854
travis.j.kessler@gmail.com, (978) 201-7710

Graduate student with 4 years of experience in academic research and open source software development. Confident in directing teammates and students as a project manager and teaching assistant. Capable of communicating across numerous scientific, engineering and business disciplines. Achievements include developing data regression models to predict chemical reaction properties with 34% more accuracy than historical average. Skilled in applied machine learning, data mining/pipelining, statistics and software engineering development/management.

TECHNICAL SKILLS

Software Languages

- * Python, C, C++
- * Javascript, HTML, CSS
- * SQL
- * Bash/Shell

Software Tools

- * TensorFlow, Keras
- * Scikit-Learn
- * Matplotlib
- * Git, SVN

Software Environments

- * Azure Web Services
- * Amazon Web Services
- * Windows Server 2012+
- * Linux (Headless, GUI)

Working Environments

- * AGILE/SCRUM
- * DevOps Lifecycle
- * Kanban Organization
- * MRPT DoJ Clearance

EDUCATION

PhD Computer Engineering – GPA 4.00

University of Massachusetts Lowell
May 2024 (Expected)

BS Computer Engineering – GPA 3.56

University of Massachusetts Lowell
May 2018

EXPERIENCE

Graduate Research Assistant

Jan. 2019 – Present

University of Massachusetts Lowell Energy and Combustion Research Laboratory

- * Leverages predictive models, including state-of-the-art machine learning models, to advance alternative fuel research
- * Investigates methods for feature selection and hyper-parameter tuning, including random forest trees, principal component analysis, genetic algorithms and artificial bee colonies
- * Manages a team of undergraduate computer science/engineering students in tasks related to current research efforts
- * Funded by the U.S. Department of Energy under award DE-EE0008479 as part of the Co-Optimization of Fuels & Engines (Co-Optima) project

Technical Operations/DevOps Engineer

June 2018 – Jan. 2019

Valora Technologies

- * Utilized data mining techniques to extract client-specified information from legal, financial and government documents
- * Constructed data pipelines to usher client documents from intake to delivery of extracted information
- * Trained newly hired DevOps engineers in data pipelining/mining workflow configuration
- * Obtained Moderate Risk Public Trust (MRPT) Department of Justice (DoJ) security clearance

Undergraduate Research Assistant

June 2015 – May 2018

University of Massachusetts Lowell Energy and Combustion Research Laboratory

- * Optimized predictive models to predict chemical reaction properties based on molecular structure (QSAR/QSPR)
- * Implemented optimal neural network architectures to multidimensional input and output (training) data
- * Developed open source machine learning, feature extraction and hyper-parameter tuning software packages
- * Published research efforts in The Journal of Open Source Software, Fuel, and the American Society of Mechanical Engineers Internal Combustion Engine Fall Conference

SELECTED AWARDS & HONORS

1 st place, Symbotic Warehouse Robot Prototyping Competition	May 2018
Innovative Technology Solution, UMass Lowell DifferenceMaker 50K Idea Challenge	April 2017
1 st place, Francis College of Engineering Prototyping Competition	Dec. 2016
UMass Lowell Francis College of Engineering Dean's Scholarship	Sep. 2014
